## WE ARE **TRINX**

Passion never waits, since riders don't either. They are always looking for comfort, performance and design combined together in new affordable solutions. Riders are looking for Trinx.

More than a bike: a journey inside youth, vigor and bravery. "Young" like our innovation, supported by in-house painting laboratories and smart automation technologies. "Vigorous" like our natural attitude, developed through Chinese vision and Italian design. "Brave" like our way of creating, your way of riding.

# THE STORY SO FAR

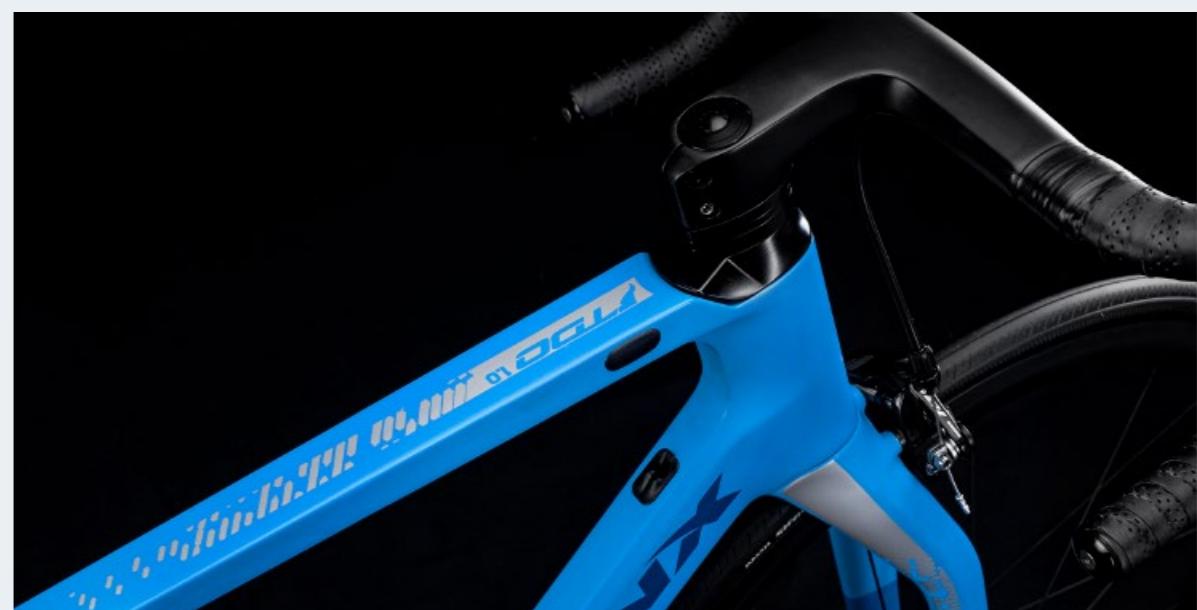

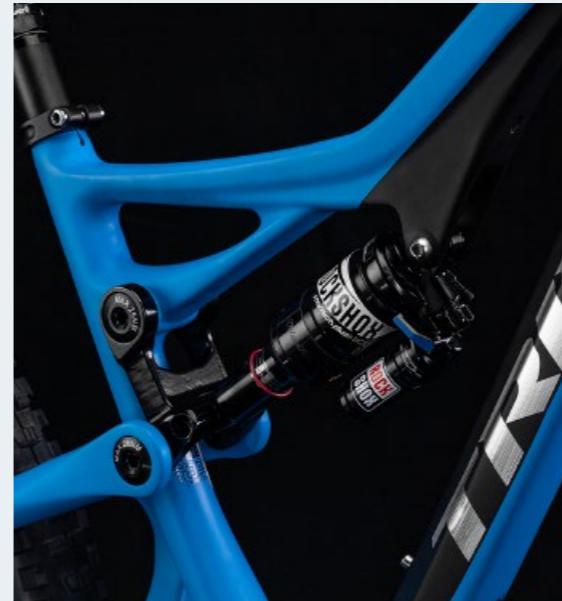

**Changing the future  
without changing the  
early passion.**

In the late '90s, the Asian market needed a significant change of pace, thus Trinity was Founded, embarking on producing and selling complete bikes. A few years later, in 2002, the company started exploring overseas market up to a turning point, in 2006 a self-owned brand was created: Trinx. The year 2014 turned the tide again: carbon fiber frame technology was introduced into the company manufacturing process. In October 2016, Trinx carbon mountain bike V1000 was a successful crowdfunding project that took place on Jingdong Mall, where in just one day the target amount of 500,000 yuan was reached. In May 2017, Trinx created a sensation on the 27th China International Bicycle & Motor Fair with its E-Bike series. Today Trinx is the milestone of the company development, thanks to cutting-edge

internal laboratories, sophisticated product lines including road, folding, mountain, E-bikes and key bicycle components.

Now we are preparing ourselves for the future without changing our vision : sharing the joy of riding worldwide.

# TDO 3.0

TRINX.COM

Ready to discover the next gen  
road bike?

Premium design and cutting-edge technology go together within the following specific features: carbon fiber frames; full hidden shifter cables and brake housings thanks to integrated handlebars; high-intensity pneumatic designed frame set. The ultra-wide bottom bracket structure and the asymmetrical frame tubes significantly improves the rigidity of the frame. The renewed bent front fork also enhances the cornering performance. TDO is compatible with classic rim brakes and disc brakes system to meet different needs for weight and brake performance. Impossible to resist the overall shape of the body and its innovative concept.
